

more pounds

Missing N means missing out.

Pounds – the simplest measure of success. AGROTAIN® can deliver more pounds of rice without changing your nitrogen application rates or your equipment. And it costs just pennies per pound of N. Four years of university testing showed an average increase of 349 lb/A for all treated fields and an average increase of 628 lb/A when fields took 3-10 days to flood. Get what you paid for – and then some. Just ask your retailer for AGROTAIN.
